-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. It is critical or essential to the practice of the invention for either the claims or the specification to set forth what temperatures the applicant considers "hot", but neither the claims or the specification provide a temperature range for the "hot air" mentioned in the applicants' claims. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by US 2001/0055555 A1 to Herman et al.

Claim 1 in the Herman et al. publication describes a method for removing pollutants out of a waste gas, such as a semiconductor waste gas: please also see paragraph no. 0001, comprising:

Art Unit: 1754

introducing one additional gas (which may be air: please also see claim 5) into a secondary inlet;

mixing together the waste gas and the air, optionally with heating, to form a precursor reactive stream, and

introducing the precursor reactive stream into a reaction chamber and causing the pollutant-abating reaction to occur within this reaction chamber.

Please also note that the abstract also sets forth that heated air enters into the central reaction chamber.

The following references are made of record:

US 2004/0191146 A1 disclosing a method and apparatus for treating exhaust gas;

US 2004/0042948 A1 disclosing the treatment method for decomposing perfluorocompounds;

The English abstract of TW 230,240 B1 disclosing a method for increasing purification efficiency of exhaust from a semiconductor manufacturing process; and

The English abstract of KR 2005-081,035 A disclosing a method for cleaning harmful materials out of a semiconductor waste gas.
